(1) Indexes from November 1977 are subject to revision. — Les indices à compter de novembre 1977 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81.— Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed.— Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillées seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisées à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. — Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

D 601017	1978	527.7	532.2	533.1	543.2									

(1) Indexes from November 1977 are subject to revision. — Les indices à compter de novembre 1977 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. — Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. — La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. — Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. — Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. — Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. — Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528 for the 1961=100 based indexes. An updated version relating to the 1971=100 series will be issued in the near future.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans Indices des prix de vente dans l'industrie, 1956-68 (n° 62-528 au catalogue) pour les indices basés sur l'année repère 1961=100. La nouvelle édition de la série 1971=100 paraîtra sous peu.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{p_1}{t_N} \times \frac{p_2}{t_N} \times \frac{p_3}{t_N} \times \dots \times \frac{p_{30}}{t_N}}$$

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index (1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique (1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'"indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

Σ is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

Σ est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base o.

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

Les prix des céréales de l'Ouest figurant dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Unit — Unité	Initial and total participation payments 1976-77, 1977-78 — Paielements initiaux et ensemble des paiements de participation 1976-77, 1977-78

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste les actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price
Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie
électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distorsions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM[®] (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

(1) Indexes from December 1977 are subject to revision. — Les indices à compter de décembre 1977 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81.— Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed.— Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillées seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisés à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. — Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

(1) Indexes from December 1977 are subject to revision. — Les indices à compter de décembre 1977 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. — Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. — La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. — Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. — Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. — Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. — Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

	1976	165.4	164.3	162.7	163.2	161.7	160.9	162.2	164.6	166.4	167.2	171.2	178.2	165.7
	1977	178.2	178.2	186.1	187.0	187.7	191.6	193.7	198.1	197.8	203.1	209.7	206.9	193.2
D 603844	1978	209.7	214.4	222.0	230.0									
Other wheeled tractors, imported — Autres tracteurs sur pneus, importés.	1974	107.2	105.6	105.6	106.2	106.5	108.4	111.2	113.6	117.1	118.0	123.4	123.3	112.2
	1975	128.2	132.9	134.5	136.4	139.4	138.4	138.8	143.4	141.8	142.3	143.4	143.8	138.6
	1976	142.0	144.2	142.7	143.1	141.9	141.3	144.5	147.5	145.7	144.7	147.3	153.4	144.9
	1977	156.0	159.8	164.6	165.0	164.6	166.0	168.0	174.9	174.7	178.9	182.6	180.2	169.6
D 603845	1978	184.6	190.4	192.1	197.6									
Contractors' tools, Canadian made(2) — Outillage de chantier fabriqué au Canada(2).	1974	110.7	110.7	110.7	110.7	114.4	115.7	115.7	120.7	120.7	120.7	120.7	120.7	116.0
	1975	120.7	123.7	123.7	123.7	127.5	127.5	127.5	131.9	131.9	131.9	136.0	136.0	128.5
	1976	136.0	136.0	136.0	136.0	136.0	127.6	127.6	127.6	127.6	127.6	127.6	127.6	131.1
	1977	131.5	131.5	131.5	135.4	135.4	135.4	135.4	135.4	135.4	135.4	135.4	135.4	134.4
D 603826	1978	135.4	135.4	135.4	135.4									
Road rollers and vibratory compactors, self-propelled, hand guided or towed, imported(2) — Rouleaux compresseurs et compacteurs vibrants, automoteurs pour routes, tractés ou conduits à la main, importées(2).	1974	122.3	120.6	120.7	122.0	126.6	132.9	137.0	137.5	142.0	149.7	150.9	155.1	134.8
	1975	156.8	163.4	161.8	163.8	167.6	167.2	167.9	171.1	170.2	171.1	172.7	172.2	167.2
	1976	170.7	169.8	168.9	170.1	168.5	168.3	168.0	170.3	168.3	168.1	170.1	173.6	170.0
	1977	182.7	184.3	189.8	192.5	192.1	193.4	199.9	204.5	205.7	210.7	214.9	213.2	198.6
D 603847	1978	217.0	223.7	225.6	231.9									
Trucks for mounting cranes, Canadian made(2) — Camions sur lesquels une grue est montée, fabriqués au Canada(2).	1974	114.1	115.3	115.2	114.9	115.2	114.9	117.0	117.1	118.1	122.5	124.6	124.5	117.8
	1975	130.8	135.6	135.4	138.8	141.8	140.8	141.2	142.6	144.8	145.3	143.2	143.5	140.0
	1976	141.7	140.8	139.3	139.8	138.5	143.1	142.9	144.8	143.0	142.9	143.2	149.0	142.4
	1977	151.9	151.1	151.1	151.1	151.0	151.0	151.0	151.0	151.0	151.1	151.1	151.1	151.1
D 603828	1978	151.1	151.1	151.1	151.1									

(1) Indexes from March 1978 are subject to revision. — Les indices à compter de mars 1978 sont sujets à révision.

(2) Not included in the construction machinery and equipment, composite index. — Non inclus dans l'indice synthétique des machines et du matériel de construction.

TABLE 8. Price Indexes of Forestry Machinery and Equipment, East of the Rockies(1)
TABLEAU 8. Indices des prix, des machines et du matériel forestiers à l'est des Rocheuses(1)

Total and Commodity Indexes, Annually and Monthly, 1972 Forward
Indices totaux, indices des marchandises, annuels et mensuels, à partir de 1972

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528 for the 1961=100 based indexes. An updated version relating to the 1971=100 series will be issued in the near future.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans Indices des prix de vente dans l'industrie, 1956-68 (n° 62-528 au catalogue) pour les indices basés sur l'année repère 1961=100. La nouvelle édition de la série 1971=100 paraîtra sous peu.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of
Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index
(1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des
matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique
(1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'"indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

\sum is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

\sum est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base O,

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

Les prix des céréales de l'Ouest figurant dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste les actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price
Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie
électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distortions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM[®] (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

Le charbon de chauffage indice	68
4. Indices des prix des produits agricoles canadiens (1971=100)	69
5. Indices des prix des aliments pour animaux, Canada et cinq régions(1)	70
6. Indices des cours des actions ordinaires et privilégiées (1971=100)	71
7. Indices des prix des machines et du matériel de construction (1968=100)	74
8. Indices des prix, des machines et du matériel forestiers à l'est des Rocheuses (1968=100)	78
9. Indices des prix de vente de l'énergie électrique (non-résidentielle) (1971=100)	79
Explication des méthodes utilisées et sources supplémentaires des séries de prix	81

Industry Selling Price Index: Manufacturing

Indice des prix de vente dans l'industrie: industries manufacturières

Percentage Change in the Industry Selling Price Index: Manufacturing

Variation en pourcentage de l'indice des prix de vente dans l'industrie: industries manufacturières

General Wholesale Price Index,
Indice général de prix de gros,
(1935-1939 = 100)

	June 1978(1) Juin	May 1977(1) Mai	June 1977 Juin	May 1977 Mai	Percentage change — Variation proportionnelle	
					June - May 1978 Juin - Mai	June 1978/77 Juin
General Wholesale Index - Total - Indice général de gros:	604.0	600.5	559.2	561.3	0.6	8.0
Vegetable products - Substance végétales	495.9	493.9	497.9	511.6	0.4	- 0.4
Animal products - Produits animaux	686.6	673.6	586.5	576.9	1.9	17.1
Textile products - Produits textiles	494.5	492.0	471.7	474.2	0.5	4.8
Wood products - Produits du bois	868.2	869.5	777.2	777.2	- 0.2	11.7
Iron products - Produits du fer	644.0	640.9	590.4	591.7	0.5	9.1
Non-ferrous metals including gold - Métaux non ferreux y compris l'or	522.1	518.6	503.8	512.4	0.7	3.6
Non-metallic minerals - Minéraux non métalliques	508.9	508.0	470.7	469.7	0.2	8.1
Chemical products - Produits chimiques	433.8	432.3	409.5	408.6	0.4	5.9
Iron products and non-ferrous metals excluding gold - Produits du fer et métaux non ferreux moins l'or	693.8	690.2	653.9	659.7	0.5	6.1
Raw and partly manufactured goods - Matières pre- mières et demi-produits	556.3	548.6	527.2	536.5	1.4	5.5
Fully and chiefly manufactured goods - Produits finis ou presque finis	629.5	628.4	575.7	573.6	0.2	9.4

(1) These indexes are preliminary. - Ces indices sont provisoires.

Industry Selling Price Index: Manufacturing
Indice des prix de vente dans l'industrie: Industries manufacturières
(1971 = 100)

	Index — Indice			Percentage change — Variation proportionnelle					Per cent contribution to total change — Contribution en pourcentage au changement total		Relative importance of groupe 1971 — Importance relative du groupe en 1971

(1) Indexes from January 1978 are subject to revision. — Les indices à compter de janvier 1978 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed. — Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillées seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisés à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. — Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

D 601017	1978	527.7	532.2	533.1	543.7	546.3	555.4							

(1) Indexes from January 1978 are subject to revision. — Les indices à compter de janvier 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. — Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. — La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. — Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. — Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. — Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. — Tous les articles moins les groupes de produits d'origine végétale et animale.

TABLE 3. Purchase Price Indexes of Industrial Materials(1)
 TABLEAU 3. Indices des prix d'achat des matériaux industriels(1)

(1) With the revision of the Farm Input Price Index to a 1971 = 100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971 = 100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971 = 100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971 = 100) au lieu de prix moyens comme complément à cette information.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528 for the 1961=100 based indexes. An updated version relating to the 1971=100 series will be issued in the near future.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans Indices des prix de vente dans l'industrie, 1956-68 (n° 62-528 au catalogue) pour les indices basés sur l'année repère 1961=100. La nouvelle édition de la série 1971=100 paraîtra sous peu.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{p_{tN}^1 \times p_{tN}^2 \times p_{tN}^3 \times \dots \times p_{tN}^{30}}$$

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index (1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique (1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'"indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

Σ is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Σ est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base o.

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

Les prix des céréales de l'Ouest figurant dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Unit — Unité	Initial and total participation payments 1976-77, 1977-78 — Paielements initiaux et ensemble des paiements de participation 1976-77, 1977-78

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste les actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (n° 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distorsions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

(1) Indexes from February 1978 are subject to revision. - Les indices à compter de février 1978 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81.- Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed.- Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillées seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisés à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. - Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

D 601017														

(1) Indexes from February 1978 are subject to revision. — Les indices à compter de février 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. — Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. — La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. — Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. — Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. — Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. — Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

TABLE 7. Price Indexes of Construction Machinery and Equipment(1) — Concluded

TABLÉAU 7. Indices des prix des machines et du matériel de construction(1) — fin

Total, Major Component and Commodity Indexes, Annually and Monthly, 1972 Forward

Indices totaux, indices des principales composantes et indices des marchandises,
annuels et mensuels, à partir de 1972

1968 = 100

		Month — Mois												Annual — Annuel
		Jan. — Janv.	Feb. — Fév.	March — Mars	April — Avril	May — Mai	June — Juin	July — Juill.	Aug. — Août	Sept.	Oct.	Nov.	Déc.	
Asphalt equipment, imported — Matériel d'asphaltage importé	1974	130.0	130.9	130.8	134.4	133.3	135.8	138.6	142.2	144.8	148.2	152.9	152.7	139.6
	1975	154.8	158.1	157.8	161.8	166.0	164.8	165.4	169.4	167.3	167.9	169.1	169.1	164.3
	1976	166.9	166.6	164.9	165.4	163.3	163.0	162.8	167.4	165.4	166.7	169.1	176.0	166.5
	1977	175.2	177.5	191.6	191.2	192.0	193.8	197.8	201.4	201.7	206.5	211.2	211.6	196.0
D 603840	1978	212.0	214.8	216.8	222.8	222.1								
Scrapers, imported — Racleuses importées	1974	115.0	115.5	116.9	116.5	122.9	125.8	129.3	138.6	140.1	145.4	146.3	146.8	129.9
	1975	160.7	161.8	161.4	164.0	167.6	166.4	166.9	168.5	169.2	170.1	171.3	172.0	166.7
	1976	169.9	171.2	169.5	170.0	168.4	167.7	168.5	170.8	169.4	171.5	174.6	181.7	171.1
	1977	186.6	189.1	196.2	197.7	199.5	201.7	202.4	205.6	205.4	212.7	222.6	219.8	203.3
D 603841	1978	220.2	223.1	226.8	237.2	230.3								
Crawler tractors, imported — Tracteurs sur chenilles importés	1974	120.1	119.3	119.2	119.4	124.9	127.6	131.2	144.9	147.2	147.0	148.5	149.3	133.2
	1975	159.1	160.2	159.6	163.7	167.2	166.3	167.7	169.8	170.3	171.3	171.2	173.1	166.6
	1976	172.6	172.1	170.2	170.8	169.2	168.5	169.4	171.7	171.4	173.2	177.1	184.6	172.6
	1977	186.8	191.4	197.3	198.0	202.0	203.4	204.1	208.1	207.6	214.5	221.9	219.1	204.5
D 603842	1978	219.9	224.1	226.0	241.2	236.2								
Aggregate equipment, composite index — Matériel de traitement des agrégats synthétique.	1974	119.2	119.0	119.8	123.7	123.8	126.4	131.4	132.4	136.9	137.4	148.9	149.2	130.7
	1975	147.3	150.0	154.0	155.9	157.7	161.5	165.5	168.3	167.6	168.0	168.5	170.1	161.2
	1976	170.6	170.6	170.2	170.5	170.4	171.7	172.3	174.6	173.5	173.4	175.3	180.0	172.8
	1977	180.4	181.8	190.6	190.3	190.0	192.4	193.2	195.3	195.3	198.0	201.7	200.8	192.5
D 603810	1978	201.0	202.6	205.2	210.1	207.4								
Aggregate equipment, Canadian made — Matériel de traitement des agrégats fabriqué au Canada.	1974	122.3	122.5	122.5	128.6	128.7	128.7	135.6	133.0	138.5	140.5	158.4	158.4	134.8
	1975	152.9	152.9	158.5	158.8	158.8	158.9	167.0	167.0	167.1	167.1	171.0	171.1	162.5
	1976	171.3	171.7	174.1	174.1	174.7	174.8	174.8	174.8	174.9	174.9	175.9	175.9	174.3
	1977	177.8	178.0	180.9	181.3	181.3	181.3	182.1	182.1	182.1	182.1	182.1	182.1	181.1
D 603825	1978	182.1	182.1	182.1	182.1	182.1								
Aggregate equipment, imported — Matériel de traitement des agrégats importé.	1974	116.5	116.0	117.5	119.6	119.8	124.5	127.8	131.9	135.5	134.7	141.0	141.6	127.2
	1975	142.7	147.6	150.3	153.5	156.8	163.7	164.2	169.3	168.1	168.8	166.4	169.4	160.1
	1976	170.1	169.7	167.0	167.6	166.8	169.0	170.2	174.5	172.4	172.1	174.8	183.5	171.5
	1977	182.6	185.0	198.6	197.8	197.3	201.6	202.4	206.9	206.3	211.2	218.1	216.4	202.0
D 603843	1978	216.7	219.6	224.5	233.5	228.4								
Attachments, imported — Pièces auxiliaires, importés	1974	117.0	116.1	118.8	118.9	121.3	123.8	127.0	137.6	141.3	143.2	145.5	145.9	129.7
	1975	151.8	155.9	157.7	162.1	165.8	164.8	165.3	167.4	166.7	168.1	166.7	167.3	163.3
	1976	165.4	164.3	162.7	163.2	161.7	160.9	162.2	164.6	166.4	167.2	171.2	178.2	165.7
	1977	178.2	178.2	186.1	187.0	187.7	191.6	193.7	198.1	197.8	203.1	209.7	206.9	193.2
D 603844	1978	209.7	214.4	222.0	230.0	222.4								
Other wheeled tractors, imported — Autres tracteurs sur pneus, importés.	1974	107.2	105.6	105.6	106.2	106.5	108.4	111.2	113.6	117.1	118.0	123.4	123.3	112.2
	1975	128.2	132.9	134.5	136.4	139.4	138.4	138.8	143.4	141.8	142.3	143.4	143.8	138.6
	1976	142.0	144.2	142.7	143.1	141.9	141.3	144.5	147.5	145.7	144.7	147.3	153.4	144.9
	1977	156.0	159.8	164.6	165.0	164.6	166.0	168.0	174.9	174.7	178.9	182.6	180.2	169.6
D 603845	1978	184.6	190.4	192.1	197.6	191.5								
Contractors' tools, Canadian made(2) — Outillage de chantier fabriqué au Canada(2).	1974	110.7	110.7	110.7	110.7	114.4	115.7	115.7	120.7	120.7	120.7	120.7	120.7	116.0
	1975	120.7	123.7	123.7	123.7	127.5	127.5	127.5	131.9	131.9	131.9	136.0	136.0	128.5
	1976	136.0	136.0	136.0	136.0	136.0	127.6	127.6	127.6	127.6	127.6	127.6	127.6	131.1
	1977	131.5	131.5	131.5	135.4	135.4	135.4	135.4	135.4	135.4	135.4	135.4	135.4	134.4
D 603826	1978	135.4	135.4	135.4	135.4	137.3								
Road rollers and vibratory compactors, self-propelled, hand guided or towed, imported(2) — Rouleaux compresseurs et compacteurs vibrants, automoteurs pour routes, tractés ou conduits à la main, importés(2).	1974	122.3	120.6	120.7	122.0	126.6	132.9	137.0	137.5	142.0	149.7	150.9	155.1	134.8
	1975	156.8	163.4	161.8	163.8	167.6	167.2	167.9	171.1	170.2	171.1	172.7	172.2	167.2
	1976	170.7	169.8	168.9	170.1	168.5	168.3	168.0	170.3	168.3	168.1	170.1	173.6	170.0
	1977	182.7	184.3	189.8	192.5	192.1	193.4	199.9	204.5	205.7	210.7	214.9	213.2	198.6
D 603847	1978	217.0	223.7	225.6	231.9	225.0								
Trucks for mounting cranes, Canadian made(2) — Camions sur lesquels une grue est montée, fabriqués au Canada(2).	1974	114.1	115.3	115.2	114.9	115.2	114.9	117.0	117.1	118.1	122.5	124.6	124.5	117.8
	1975	130.8	135.6	135.4	138.8	141.8	140.8	141.2	142.6	144.8	145.3	143.2	143.5	140.0
	1976	141.7	140.8	139.3	139.8	138.5	143.1	142.9	144.8	143.0	142.9	143.2	149.0	142.4
	1977	151.9	151.1	151.1	151.1	151.0	151.0	151.0	151.0	151.0	151.1	151.1	151.1	151.1
D 603828	1978	151.1	151.1	151.1	151.1	151.1								

(1) Indexes from May 1978 are subject to revision. — Les indices à compter de mai 1978 sont sujets à révision.

(2) Not included in the construction machinery and equipment, composite index. — Non inclus dans l'indice synthétique des machines et du matériel de construction.

TABLE 8. Price Indexes of Forestry Machinery and Equipment, East of the Rockies(1)
TABLEAU 8. Indices des prix, des machines et du matériel forestiers à l'est des Rocheuses(1)

Total and Commodity Indexes, Annually and Monthly, 1972 Forward

Indices totaux, indices des marchandises, annuels et mensuels, à partir de 1972

1968 = 100

		Month — Mois												Annual — Annuel
		Jan. — Janv.	Feb. — Fév.	March — Mars	April — Avril	May — Mai	June — Juin	July — Juill.	Aug. — Août	Sept.	Oct.	Nov.	Dec.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528 for the 1961=100 based indexes. An updated version relating to the 1971=100 series will be issued in the near future.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans Indices des prix de vente dans l'industrie, 1956-68 (n° 62-528 au catalogue) pour les indices basés sur l'année repère 1961=100. La nouvelle édition de la série 1971=100 paraîtra sous peu.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index (1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

Indices du prix d'achat des matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique (1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumieux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

\sum is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

\sum est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base o.

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

Les prix des céréales de l'Ouest figurant dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste des actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distortions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM[®] (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

TABLE OF CONTENTS

	Page
Chart	IV
Table	
1. Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities (1971=100)	2
Major Group:	
1. Food and Beverage Industries	2
2. Tobacco Products Industries	15
3. Rubber and Plastics Products Industries	16
4. Leather Industries	19
5. Textile Industries	20
6. Knitting Mills	23
7. Clothing Industries	25
8. Wood Industries	27
9. Furniture and Fixture Industries	31
10. Paper and Allied Industries	32
12. Primary Metal Industries	38
13. Metal Fabricating Industries (Except Machinery and Transportation Equipment Industries)	41
14. Machinery Industries (Except Electrical Machinery)	43
15. Transportation Equipment Industries	46
16. Electrical Products Industries	48
17. Non-metallic Mineral Products Industries	52
18. Petroleum and Coal Products Industries	55
19. Chemical and Chemical Products Industries	56
20. Miscellaneous Manufacturing Industries	60
2. General Wholesale Indexes (1935-39=100)	64
3. Purchase Price Indexes of Industrial Materials: Secondary Metals (1971=100)	66
Thermal Coal Index (1971=100)	68
4. Canadian Farm Products Indexes (1971=100)	69
5. Feed Price Indexes, Canada and Five Geographical Regions(1)	70
6. Index Numbers of Common and Preferred Stock Prices (1971=100)	71
7. Price Indexes of Construction Machinery and Equipment (1968=100)	74
8. Price Indexes of Forestry Machinery and Equipment, East of the Rockies (1968=100)	78
9. Electric Power Selling Price Indexes (Non-residential) (1971=100)	79
Explanation of Methods Used and Additional Sources for Price Series	81

TABLE DES MATIÈRES

	Page
Graphique	IV
Tableau	
1. Indices des prix de vente dans l'industrie par groupe principal, par industries et par produits (1971=100)	2
Groupe principal:	
1. Industries des aliments et boissons	2
2. Industrie du tabac	15
3. Industrie du caoutchouc et des produits en matière plastique	16
4. Industrie du cuir	19
5. Industrie textile	20
6. Bonneterie	23
7. Industrie de l'habillement	25
8. Industrie du bois	27
9. Industrie du meuble et des articles d'ameublement	31
10. Industrie du papier et activités annexes	32
12. Première transformation des métaux	38
13. Fabrication de produits en métal (sauf machines et équipement de transport)	41
14. Fabrication de machines (sauf électriques)	43
15. Fabrication d'équipement de transport	46
16. Fabrication de produits électriques	48
17. Fabrication de produits minéraux non métalliques	52
18. Fabrication de produits du pétrole et du charbon	55
19. Industrie chimique	56
20. Industries manufacturières diverses	60
2. L'indice général de gros (1935-39=100)	64
3. Indices des prix d'achat des matériaux industriels: Métaux secondaires (1971=100)	66
Le charbon de chauffage indice	68
4. Indices des prix des produits agricoles canadiens (1971=100)	69
5. Indices des prix des aliments pour animaux, Canada et cinq régions(1)	70
6. Indices des cours des actions ordinaires et privilégiées (1971=100)	71
7. Indices des prix des machines et du matériel de construction (1968=100)	74
8. Indices des prix, des machines et du matériel forestiers à l'est des Rocheuses (1968=100)	78
9. Indices des prix de vente de l'énergie électrique (non-résidentielle) (1971=100)	79
Explication des méthodes utilisées et sources supplémentaires des séries de prix	81

Industry Selling Price Index: Manufacturing

Indice des prix de vente dans l'industrie: industries manufacturières

Percentage Change in the Industry Selling Price Index: Manufacturing

Variation en pourcentage de l'indice des prix de vente dans l'industrie: industries manufacturières

General Wholesale Price Index,
Indice général de prix de gros,
(1935-1939 = 100)

	August 1978 (1) Août	July 1978 (1) Juillet	August 1977 Août	July 1977 Juillet	Percentage change	
					Variation proportionnelle	
					August - July 1978 Août - Juillet	August 1978/77 Août
General Wholesale Index - Total - Indice général de gros:	610.1	603.3	564.4	563.8	1.1	8.1
Vegetable products - Substance végétales	491.4	487.3	484.9	497.1	0.8	1.3
Animal products - Produits animaux	684.3	677.0	589.4	592.3	1.1	16.1
Textile products - Produits textiles	504.6	501.1	472.9	473.1	0.7	6.7
Wood products - Produits du bois	692.1	674.5	814.7	790.0	2.0	9.5
Iron products - Produits du fer	649.6	648.7	601.7	596.0	0.1	8.0
Non-ferrous metals including gold - Métaux non ferreux y compris l'or	538.9	524.5	495.4	509.7	2.8	8.8
Non-metallic minerals - Minéraux non métalliques	511.3	510.3	485.5	474.1	0.3	5.3
Chemical products - Produits chimiques	438.3	438.8	410.6	413.1	- 0.1	6.8
Iron products and non-ferrous metals excluding gold - Produits du fer et métaux non ferreux moins l'or	705.7	697.8	654.7	660.6	1.1	7.8
Raw and partly manufactured goods - Matières pre- mières et demi-produits	553.7	546.9	519.7	531.4	1.2	6.5
Fully and chiefly manufactured goods - Produits finis ou presque finis	640.4	633.7	588.0	580.4	1.1	8.9
